**Subject:** Another important consideration from Shaun McGrath

Hi Jennifer,

Can you look into this, as well? Sorry for the additional work!! ☺

Tim,

Please check this statement from August 10 statement:

"This system is discharging treated water to Cement Creek at levels cleaner (higher pH and lower levels of metals) than pre-event, background conditions in the creek."

It is my understanding that while the water discharged into cement creek is much higher quality than what is coming out of mine, are we sure that it is better than pre event?
